Ok, sounds good. Wasn't sure, so wanted to ask. :-)

Yes, permission given for any photos you would like to use and a mention of my website at www.MyAmigaShop.com would be great. :-)

If I don't get to bogged down with the description, it should be up within a couple of hours.

Thanks,
Robert

Subject: Re: Amiga GVP T-RexII 68060 Accelerator

Hi Robert,

I appreciate your asking (very much!) :) I'm usually up until midnight or so here in Indiana (EST).

Though it's a tough call on this one--as much as I want a T-Rex II, it might be better to take your time and post it tomorrow, as my cash limit is lower (can really only afford about \$800).

I've no problem letting someone else grab it; there are the ~\$640 '060 accelerator boards that I'll probably look at in order to stick to my price range.

But I will happily be taking a look at the photos, etc. as I'm always keen on seeing the T-Rex II in the wild--especially for my GVP 4060 page:

<https://www.gregdonner.org/gvp4060/gvp4060.html>

May I ask for your permission (ahead of time?) to use one or more of your excellent photos for the support page? I would of course happily give you credit (your eBay store link, and if you like your first and/or last name?) Just let me know--I understand if not!

In any case, I don't think you'll have any problem whatsoever selling it! Just a question of who the first person is that buys it. :)
